## Career Objective

Information Technology undergraduate with a foundation in web development and a strong interest in visual design and user experience. Seeking a Visual Designer role to apply my understanding of HTML, CSS, responsive interfaces, and user-centred design principles to create intuitive, visually appealing, and accessible digital experiences while continuously developing my design skills.

---

## Academic Details

**Bachelor of Engineering in Information Technology** July 2023- Present

CGPA-7.5, Up to Sem VI (Mumbai University)

**Higher Secondary School Certificate (HSC) -** June 2021 – May 2023
61.17% (Maharashtra State Board)

**Secondary School Certificate (SSC)-** March 2021
85.20% (Maharashtra State Board)

---

## Projects

**Campus Connect – Peer-to-Peer Student Learning Platform**

- Developed a full-stack peer-learning platform using Next.js, React, TypeScript, Node.js, and MongoDB Atlas for XIE students to ask questions and share knowledge.
- Implemented JWT authentication, request/answer management, deadlines, points-based leaderboard, profiles, and protected routes with XIE student email validation.
- Integrated Cloudinary for image/video attachments and built a responsive interface with Tailwind CSS

**Trip Expense Management System**

- Developed a Django-based expense management application using Python, Bootstrap, and MySQL.
- Implemented expense tracking, bill management, and optimized payment settlement logic.
- Designed a responsive user interface for efficient group expense management.

**Krishi Mitra – AI-Based Smart Farming Assistant**

- Designed an AI-powered agriculture system using CNN, Machine Learning, and Random Forest algorithms.

- Implemented soil classification, nutrient deficiency detection, and crop recommendation features.

**LULC Change Detection & Urban Heat Island Analysis of Mumbai**

- Analysed Mumbai's land-use changes using satellite imagery and Random Forest classification.
- Computed NDVI, NDBI, NDWI, and LST indices to assess Urban Heat Island effects.
- Predicted future land-use trends for 2045 using Linear Regression models.

---

## Technical Skills

- Languages: Node, React, Java (Basic), Python
- Web Development: HTML, CSS, Bootstrap, MERN
- Tools & Technologies: Visual Studio, Git, GitHub, Google Colab, Google Earth Engine, Figma (Basic), Canva.
- Machine Learning: Random Forest, Linear Regression
- Database Technologies: MySQL, MongoDB

---

## Soft Skills

- Attention to detail
- Team collaboration
- Clear and concise communication
- Adaptability and continuous learning
- Time and task management

---

## Certificates

- IBM Skills Build Big Data & Business Management
- Mastering Engineering Documentation with LaTeX

---

## Extracurricular Activities

**Sports Admin**

- Coordinated and managed college sports events and tournaments.
- Demonstrated leadership, teamwork, and event management skills.

**Hackathon**

- Participated in the 24-hour HackX 2.0 Hackathon.
